

Day 01 :-  
Laying the foundation for  
your Marketplace Journey :-

Type => Q-Commerce

Purpose :-

I am choosing a Q-Commerce food restaurant focuses on delivery and giving a fresh, tasty and delicious meals in Breakfast, Lunch, Dinner etc for our customers. We also provide groceries to customer specially a "Working Women and House Wife" in a fast and efficient manner typically within an hour. It prioritizes convenience, speed, and accessibility offering online ordering and rapid delivery service to cater to the growing demand for instant food option.

# Business Goals :-

\* What problem does your marketplace aim to solve ?

Our marketplace aim to give fresh, tasty, delicious and hygienic food to our customers and give a fresh and branded grocery item and also solve the problem of slow food delivery by offering quick, reliable and efficient meal services!

\* What is your target audience ?

Our target audience is not especially any specific person we target all the person who have lead any profession just includes busy professionals, students, anyone seeking fast etc, convenient food delivery with minimal wait time.

\* What products or services will you offer?

We are here to offer you a Huge variety and provided a tasty and Hygienic Breakfast, lunch, Dinner etc. And we also provided a fresh and Branded grocery items. And we also give a fast delivery option of all of them. To delivered your item quickly through our platform.

\* What will set your marketplace apart (e.g: speed, affordability, customization)?

Our marketplace stands out through ultra fast delivery, affordable prices for all the person purchase our products, customizable meal options for any specific event and a seamless user experience.

## Data Schema :-

- In data schema first of all we decide which type of data we store in our data schema;

### For Example :-

- ① Restaurant Information
- ② Menu Categories & items
- ③ Customer Details
- ④ Orders
- ⑤ Payments
- ⑥ Reviews & Rating
- ⑦ Delivery
- ⑧ Shipment

And if you want to give Coupons to your customers, Subscription Offer, Promotions your Restaurant and customer want to reserve table before arriving on your Restaurant; So you can add some more data type.
